

School of Management

Management Undergraduate Program

Yi-ting Hsiao

Graduation Year: 2014

Current position: Taifex (Taiwan Futures Exchange)

City: Taipei

„Among all the courses I took, the seminars on Futures and Options and on Risk Management had the biggest impact on me!”

The MUP was a journey of self-discovery and a process of clarifying my plans for the future. Its flexible program structure allowed me to try out courses of different departments in the School of Management during my first two years. In the end, I decided to do a double major in Business Management and Finance which foundation for my master's studies and my career in the finance industry.

The MUP will allow you many career choices in the future. You can gain insights into the wide field of business studies by “sampling” courses from different departments. Also, it is great to meet students from other departments, and to get to know overseas students and experience different learning environments and cultures.

Among all the courses I took, the seminars on Futures and Options and Risk Management had the biggest impact on me. I still remember how the instructor explained the basic concepts of derivative financial instruments and valuation models in a very clear manner. In addition to theoretical learning, there were many talks by invited speakers from the finance industry, which were very helpful to understand the practices of the industry.

All these experiences in and out of the classroom were the basis for my decision to study for my Master's degree in Finance and Economics in Lund, Sweden, pass the Financial Risk Manager exam, and then enter a career in Finance when I came back to Taiwan
